**DropSens** launches **Screen-Printed Carbon Electrodes (SPCEs)** modified with **ExtrAvidin**.

ExtrAvidin modified SPCEs are versatile platforms for the development of several (bio)sensors, providing a stable **high affinity surface** for a large amount of **biotinylated molecules**.

*Ceramic substrate:* L33 x W10 x H0.5 mm

*Electric contacts:* Silver

The electrochemical cell consists on:

*Working electrode(s):* ExtrAvidin / Carbon

*Auxiliary electrode:* Carbon

*Reference electrode:* Silver

EX SPCEs are commercialised in 50 units packs individually packed. Store at 2- 8 ° C, protected from light.
